

NapTrak™

Business Software for Building and Construction

www.napconet.com

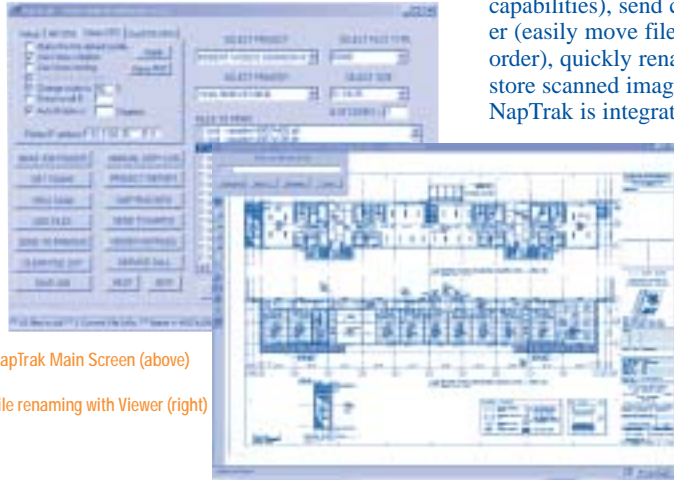

“You can save \$3000 per seat per year”

NapTrak benefits

- ▶ Check plots for accuracy with the viewer
- ▶ Non-CAD users can access files and review
- ▶ Turn any plotter into a digital reproduction machine
- ▶ Make multiple copies without needing to collate
- ▶ Easy production renaming of scanned TIFF files
- ▶ Drag and drop makes it easy to build jobs
- ▶ Track all printing and copying costs including prints sent to Napco
- ▶ Even tracks plots directly out of AutoCAD 2000 or above
- ▶ Automatic, easy to read reports
- ▶ A click creates invoices for reimbursement

NapTrak helps you work smarter.

NapTrak gives any firm the ability to use their digital printer/copier to turn their flat files into network files, and turn any plotter into a digital reproduction machine. Users can create job folders (even easier with new drag and drop capabilities), send collated copies to the printer (easily move files up or down the collation order), quickly rename scanned files, and store scanned images for future use. Because NapTrak is integrated with the features of the

NapTrak Main Screen (above)

File renaming with Viewer (right)

most popular printing equipment, it can be used as a front end for document control and production.

The NapTrak viewer gives non-CAD users access to files for viewing (and printing) right from their desk, eliminating the need for extra licenses of costly software. It is extremely

simple to use... there is very little learning curve. NapTrak will reduce your reliance on hard copy flat files by giving you an easy to use, easy to organize electronic file system. Find the job or the print you're looking for in a matter of clicks.

NapTrak makes your firm money.

Many of our customers get printing cost reimbursement from their clients. If you do too, you can't afford to live without NapTrak. Every plot your office prints without tracking and billing it to a client is lost income.

Those losses add up fast. The average design firm loses over \$3000 per seat per year in extra income. That's how much NapTrak users average per year by tracking their plots quietly in the background. That's over \$24,000 of extra income for an 8 station firm every year!

NapTrak Admin Screen (left)

Usage Reports (below) can easily be saved or printed as an invoice

Account for printing, plotting and copying costs of files sent through NapTrak to your printer. It works with any file your printer can accept. Users select a "bill to" project from a customizable pull down menu. You can even track copies made by hand on any copier by using the manual copy button.

The AutoCAD plug-in module allows users of AutoCAD or AutoCAD LT versions 2000 or above to account for plots sent from each workstation.

No need to run additional software. NapTrak will create its own project reports and allow the user to view them. Customize cost variables so that reports can be used as an invoice or used to track actual costs. If you choose, you can import NapTrak's comma separated log file into your billing software.

More about NapTrak™

www.napconet.com

NapTrak makes it even easier to do business with Napco.

When you need service on your plotter or copier, NapTrak is a great tool to let our award winning service team know what your problem is. Placing a service call with NapTrak couldn't be easier. Just check off one or more of the common problem boxes or enter more specific info for our service team and click send. NapTrak notifies our service people electronically so there is no need to worry about contacting us after hours. There is no need for you to remember to call the next day.

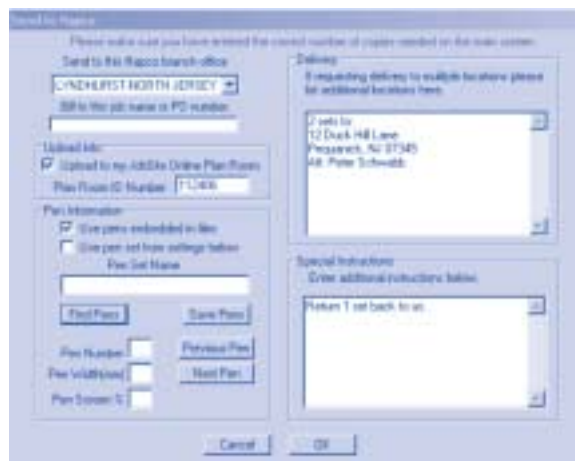

If it's after hours or you're just too busy to call us, you can use NapTrak to request service on your printing equipment.

24 hours a day 7 days a week, easily order the same supplies that our support team would recommend for use with your equipment.

Need to order printing supplies for your equipment? No problem, NapTrak has you covered. Just select the copier or printer model you are ordering for. NapTrak will then display supplies available for that model. This removes some of the confusion involved when trying to remember what to order for which machine. Order for as many machines as you need and click send, any time night or day.

Of course, the ultimate insurance policy for NapTrak users is its ability to send files to Napco for printing when their equipment is down or busy. It's simple; instead of clicking "Send to Printer" click "Send to Napco". Enter some basic production information, and special instructions and your done. But don't forget because of Napco's extensive delivery network you may also want to enter in additional delivery addresses to save yourself the trouble of sending out the job when it is returned to you. NapTrak will now compress the files and send them to our production queue for printing.

If your printer or plotter is down or busy, you can print to our printers as easily as printing to your own

"Shorten the time it takes to distribute prints"

▶ Your printing insurance policy... When time is of the essence or your printing equipment is down or busy click "Send to Napco" and let us worry about it

▶ Have to distribute prints? Just enter multiple delivery addresses and we'll take care of it

▶ Send to Napco button includes option for uploading to your JSOL Plan Room

▶ Get faster turn around and detailed tracking of your vital documents

▶ Order supplies or request a service call for your printing equipment anytime 24x7

▶ Password protection for supply ordering, reporting features and administration of project data
